

I would like to ask the NAB and whoever else involved to please get off of XM's backside. Why is it that everytime that something good comes along, youall have to mess with it. I have been an XM subscriber for just shy of 2 years. I originally purchased the first receiver because I traveled to places that it was difficult to get ANY reception from terrestrial radio stations (AM or FM). XM was a blessing to me since I spent 10-14 hours a day in my car. I am glad that XM is now able to give traffic & weather reports in some large cities!! I depend on them when I travel cross country to keep me safe & help me plan my trips. I really hate having to "channel surf" on AM or FM radio in strange cities & XM has been a big help on that. I can't wait until Oklahoma City & Tulsa are included on the traffic channels. I pay good Money for a GREAT QUALITY service & would appreciate people leaving the good people at XM alone.

Do you at the FCC ban satellite TV from broadcasting the local news? I think not. Please reject the NAB's petition 04-160 and let XM continue to let XM bring me the programming that I deserve.

Thank You,

Jason C. Brinker
